## SUMMARY

Enthusiastic engineering student with a passion for web development, seeking opportunities to apply theoretical knowledge in a practical setting. Although lacking professional experience, I am dedicated, quick to learn, and committed to delivering high-quality results. Eager to contribute to projects, I bring a fresh perspective and a strong work ethic. My academic background equips me with problem-solving skills and a solid foundation in programming languages. Open to mentorship, I am ready to immerse myself in real-world challenges, grow as a web developer, and make a meaningful impact.

## PROJECTS

### Content Management Tool – Blogging website

Bharath Intern • <https://preethigk23.github.io/openpage/> • September 2023 – October 2023

- Create a successful blogging website by defining your niche and purpose, choosing a memorable domain name, and selecting a user-friendly platform like WordPress.
- Set up reliable hosting, design a clean and responsive layout, and focus on producing high-quality, SEO-optimized content. Build an email list, leverage social media for promotion, and consider various monetization strategies.
- Utilize analytics to track performance, engage with your audience, and stay consistent with posting.
- Adapt and evolve your strategy based on feedback, ultimately creating a valuable and engaging online presence.

### Project Management Tool – Task Assignment Website

Bharath Intern • <https://preethigk23.github.io/taskassignment/> • September 2023 – October 2023

- A task assignment website streamlines project management by facilitating efficient task distribution and collaboration. Users can create, assign, and track tasks within a centralized platform, enhancing team coordination.
- Features may include priority settings, deadlines, and progress tracking. Notifications keep team members informed about updates and deadlines.
- The platform may offer file sharing, communication tools, and performance analytics, fostering productivity.
- It's an invaluable resource for businesses and teams seeking organized workflows, improved communication, and effective task management.

BMS Insitute Of Technology And Management • Banglore,Karnataka • 8.6

---

## CERTIFICATIONS

### Full Stack Web Development

Bharath Intern • 2023

- Certified as Active participant from Bharath Intern

---

## COURSEWORK

### Full Stack Web Development

Udemy

I'm currently learning full-stack web development on Udemy. On the frontend side, I've been working with HTML, CSS, and JavaScript. I've also delved into modern frontend frameworks such as React, Angular. For the backend, I've been focusing on Node.js, Python and I've been learning about server-side frameworks like [mention the specific framework, like Express, Django, Ruby on Rails, or Spring]. Overall, I'm gaining a comprehensive understanding of both frontend and backend development to become a full-stack developer.

---

## SKILLS

Frontend Programming Language – HTML, CSS, JS, Bootstrap.

Backend Programming Language – React, Node.js(basic)

Programming language– C, C++, Java
